CATALOGUE APRIL 2022

ACCESSORIES FOR ESCALATORS

Stingl's handrail and escalator protectors keep systems safe from installation through to commissioning whenever the protective films provided by the manufacturer aren't enough in their own. Our work tents provide protection during preliminary excavation work.

SCHWABENGALERIE STUTTGART-VAIHINGEN

The architecturally appealing shopping centre is part of a sophisticated urban development plan. 85 engineers and architects have joined forces with 650 construction workers on a building that houses around 50 specialist shops and a wide range of eating estab-

lishments. Escalators totalling 140 meters in length will keep people moving around the renovated building, all of which have been kept safe with Stingl protectors until the shopping centre opened its doors.

ACCESSORIES FOR ESCALATORS

Escalator Protection	115
Handrail Protection	115
Work Tent	115

ESCALATOR PROTECTION

Escalators are exposed to several external impacts during the installation process (e.g. weather, third parties working on site etc.). Common foil protection is often insufficient in order to avoid damage. High repair and cleaning costs are the possible result.

The STINGL escalator protection has many advantages over conventional solutions:

- Protection of escalators during the whole construction phase of a building
- Avoiding of escalator "utilisation" by third parties during standing times
- Saving of repair costs caused by damage on site

- Time and administration savings due to avoiding of damage to escalators
- Cost savings due to re-usability instead of new expensive solutions for every project
- Light-weight synthetic material allows easy handling
- Reduced packing measures facilitate transportation to and from site
- Weather-resistant and sturdy material
- The protection fits also in the rounded upper and bottom sections of the escalator
- Several protection elements can be coupled to a chain
- Damaged tubes can be exchanged easily

Item No.	Description
022999004	Escalator Protection 2,150x1,500 mm

HANDRAIL PROTECTION

The handrail protection provides the following benefits:

- Self clamping
- Quick and cost efficient mounting
- Avoids repair and cleaning costs
- Also suitable for curved sections

In connection with the escalator protection, the handrail guards perfectly avoid or reduce damages on site.

Both protective items can also be combined with foil protection provided by the escalator manufacturer.

Item No.	Description
022999003	Handrail protection for escalators and travelators

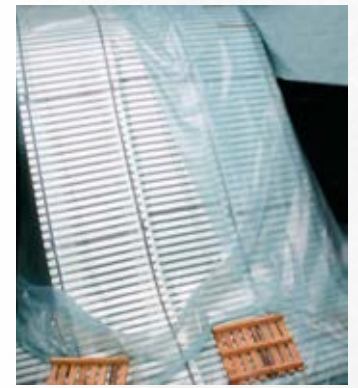

WORK TENT

DESIGN AND FUNCTION: Both front sides can be opened in the middle and closed with belts. Reinforced joints. Red/white hazard markings, circum-

ferential. The clothing is fastened with belts to the frame.

Item No.	Description	Length	Width	Ridge height	Marginal height
088999001	Work tent Type A 200 tubular steel scaffolding	2,000	2,000	2,100	1,650
088999006	Work tent Type A 300 tubular steel scaffolding	3,000	2,000	2,100	1,650
088999007	Work tent Type A 450 tubular steel scaffolding	4,500	2,000	2,100	1,650

CUSTOMISATION UPON REQUEST

Details: White PVC-tubes 80x30x2mm, connected with two synthetic bands (screwed).

Overall dimensions of an extended element:
2,150x1,500x35mm (LxWxH)

Details: PE-foam
Colour: blue
Standard length: 2m ±2%
Opening width: max. 92mm
Strength: 18mm
Meter per packing unit: 72m (36 pieces)

Details: PSE-clothing on both sides coated with PVC, circa 600g/qm, durable against rotting
Colour: white/translucent
Frame: Steel, 32/1.5mm, passivated, foldable
